

According to these pics from our friends at [Flying Colors Aviation Inc.](#), the paint job is underway on the P-51C Mustang *Tuskegee Airmen*!

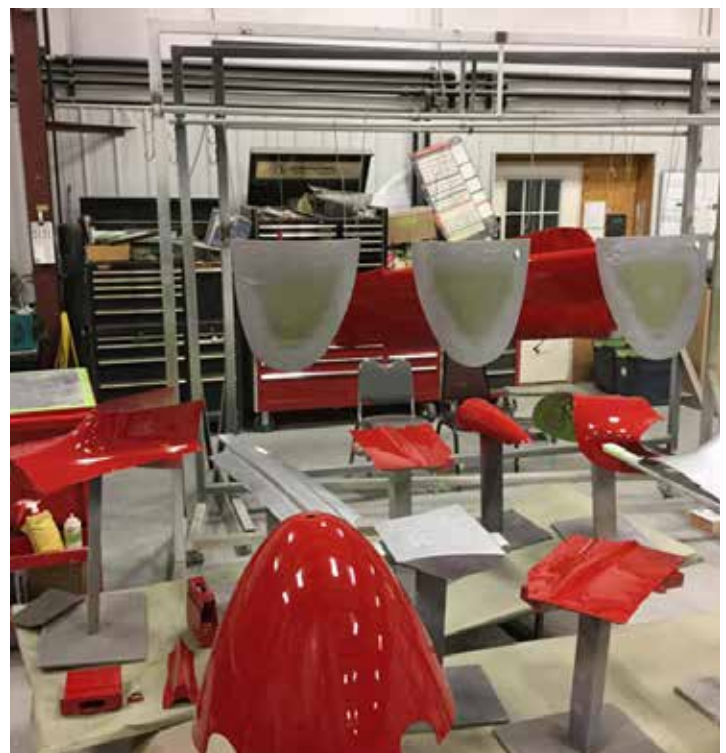

1. Masked and ready for primer application.
2. Zinc chromate epoxy primer (green) for long-term corrosion resistance.
3. High-build epoxy primer (white) for added protection and to achieve a smoother surface.

P-51C Mustang *Tuskegee Airmen* getting a coat of silver metallic basecoat

Painted and pre-assembled control surfaces and other parts on the P-51C Mustang *Tuskegee Airmen* for layout and design scheme application

Parts ready for wet sanding and buffing

Back masking in between colors, prepped for the white star

Jim Hutchison applying multiple a multiple color layup scheme

[Watch this video](#) and check out the silver going on the Mustang!
Can't wait to see her all finished up. Should be this month!
